

## ■ Concept to Completion®

For over twenty-five years, Bridge Builders has provided consistent service based on our extensive knowledge and understanding of how to build bridges.

The complexity of building your vehicular bridge is in the competent hands of licensed engineers, attentive management, and skilled crews, employing our proven *Concept to Completion®* methods. You can focus on managing other important aspects of your project, leaving the bridge building to us.

"Top Down" installation

NatureWalk, Seagrove, FL

Boot Ranch Development, Fredericksburg, TX

Because of our history of leadership and superior performance, Bridge Builders was selected to build the longest, pile-supported HS-25 timber vehicular bridge in the United States at NatureWalk, in Seagrove, Florida.

Construction is complete on the 780-foot long, 42-foot wide bridge that crosses protected wetlands. One of a number of vehicular bridges in this prestigious project in Florida, our bridges cross wetlands to allow access to marketable land in the development.

**Discover why Bridge Builders is the natural choice for your timber vehicular bridge project.**
